EXPERIENCE WITH CISCO
PACKET TRACER.

PROFILE

I seek a position with an organization where I can leverage my skills and expertise in Management, IT, Programming, and System Administration to drive operational excellence and innovation. I am eager to contribute to a dynamic and growth oriented team while expanding my professional knowledge and abilities. My goal is to thrive in a resourceful, collaborative, and flexible environment that values creativity, continuous learning, and impactful contributions.

EDUCATION

Higher National Diploma in Software Engineering	2023 - 2024
National Institute of Business management - Kandy	
Diploma in Software Engineering	2022 - 2023
National Institute of Business management - Kandy	
Diploma in English	2019
SIBA Campus - Palkekele	
GCE Advance Level Examination	2021
Wariyapola Sri Sumangala College - kandy	

WORK EXPERIENCE

FBC Asia Pacific Lanka

IT Support Intern (2025 January - November)

Assisted in managing and maintaining IT infrastructure, including laptops, desktops, and network devices to ensure smooth daily operations.

Supported installation, configuration, and troubleshooting of operating systems and software applications for internal teams.

Helped implement basic networking tasks such as configuring IP addresses, managing Wi-Fi access points, and ensuring connectivity across departments.

PROJECTS

SLTB Season Issuing System For SLTB (2023)

Developed a web application for online purchase of bus season tickets, aiming to streamline the ticketing process and minimize long queues at bus stations.

Technologies used: HTML,CSS, PHP, JavaScript, MongoDB

Vehicle Parts Stock Management System (2022)

Developed a C# Vehicle Parts Stock Management System integrated with SQL Server, enabling staff to view available stock, generate detailed invoices, and efficiently manage inventory records.

EXPERTISE

- Management Skills
- Creativity
- Teamwork
- Communication
- Leadership
- Adaptability
- Critical Thinking
- Negotiation
- Time Management

LANGUAGES

- English
- Sinhala

Online Computer Parts Odering Platform (2024)

Developed an online computer parts ordering platform using HTML, CSS, JavaScript, and MySQL, enabling users to browse and purchase computer parts online, track orders, manage their cart, and streamline the shopping experience.

Task Management System (2023)

Developed a JavaScript and MySQL based Task Management System, enabling users to track tasks, manage deadlines, assign responsibilities and efficiently organize workflow records.

Online Food Ordering App (2025)

Developed a food ordering and delivery app using Flutter, featuring AI powered food recommendations that suggest personalized meals based on user preferences and past orders. The app also allows users to browse menus, place orders, , and manage payments seamlessly.

FitZone Web Application (2025)

Developed a dynamic fitness center management web application using Node.js, Express, and SQLite, featuring secure user authentication, membership and class management, trainer details, and a personalized dashboard. The app also allows users to register online, browse services, submit queries, and access workout and nutrition content seamlessly.

Arduino CNC Foam Cutting Machine (2024)

Built a robotics project using various software and hardware components with Arduino.

Smart Car parking System (2024)

Built a iot project using various software and hardware components.

Personal Portfolio Website (GitHub Hosted) (Present)

Developed and deployed a responsive personal portfolio website using Next.js, TypeScript, JavaScript, and CSS, and hosted it on GitHub. The website showcases technical skills, featured projects, and achievements through an interactive and user-friendly interface, allowing potential employers to explore work samples and connect easily through integrated contact and social media links..
